

Our Team

Our CEO is a patent attorney with over 25 years experience both in-house as well as outside counsel representing fortune 500 Companies.

Executive staff averages 15+ years in the industry with the primary focus being Fortune 500 Company licensing and litigation support.

Texas IP Labs is staffed with CTO level engineering talent.

Our experts have extensive experience and knowledge in patent research, with many having patent applications and grants.

Centrally located in Houston Texas our lab facility contains a full complement of tools and equipment for detailed technical investigations.

The Proven Solution For IP Services

- *Technical Investigation*
- *Patent Infringement*
- *Defensive & Licensing Support*
- *Portfolio Analysis*
- *Expert Witness Services*

Services

Technical Investigation

- Reverse Engineering
- Integral Circuit Analysis
- Process and Structural Analysis

Patent Infringement

- Forensic Engineering
- Claim Chart Generation
- Expert Documentation

Defensive & Licensing Support

- Standard and Patent Pool Essentiality Determination
- Valuation of Patents
- Merger and Acquisition Product/Portfolio Due Diligence

Portfolio Analysis

- Reverse Engineering
- Integral Circuit Analysis
- Process and Structural Analysis

Expert Witness

- Provide and Support Highly Qualified Expert Witnesses

Project Experience

Systems

- Laptops
- Servers
- Handheld Computers
- Desktops & Subsystems
- Optical/Electrical Networks
- Medical Devices
- Cameras

Software

- Audio Codec's
- Video Codec's
- Executable Software
- Encrypted/Compiled/Locked
- Standards and Patent Pool Essentiality

Smart Phones/Pad Computers/PDA's

- Mechanical
- Electrical
- Embedded Software
- RF Data
- User Interface

Semiconductors

- Packaging
- Circuit
- Construction Analysis
- Embedded Code Extraction

Capabilities

Systems Lab

- Our Systems Lab performs detailed analysis covering a wide range of technologies on a multitude of electronic systems and hardware.

Circuit Imaging

- By utilizing the latest imagery technology our experts can ascertain and document the specific circuit details of a device under examination.

Circuit De-Layering

- Through the meticulous process of de-layering we can determine the internal components of the circuit design in use thus supporting our patent analysis.
